## Introduction to our Firm

### *General*

Global Engineering & Contracting, Inc. is best qualified to meet your engineering, construction management, operation and maintenance needs because we specialize in water and wastewater engineering and construction services for public and private clients. We have served major Florida municipal and private clients since 1994 and are thoroughly experienced in solving design, mechanical and operational problems in this region.

Our staff has designed more than 1,200 miles of water, wastewater and reuse water lines in Florida, as well as pumping stations and major water and wastewater treatment facilities. Currently, we are engaged in designing and constructing wastewater package plants and lift stations for private developments and municipalities.

We have an excellent relationship with the regulatory agencies which facilitates expeditious permit application approval. We will provide you with direct contact with the management for your project on a day-to-day basis.

Global Engineering & Contracting, Inc. has a sterling reputation of completing

every system we begin, to the complete satisfaction of the owner and operators.
